

AMENDMENTS TO THE CLAIMS:

Kindly amend claim 1 as follows:

Listing of claims:

1. (currently amended) A fuel cell system comprising:
a power source having one or more cell cavities;
a fuel storage unit for containing flowable fuel;
a first flow path for providing flowable fuel from the fuel storage unit to the power source;
a second flow path for providing flowable fuel, which has not been deposited into the one or more cell cavities, ~~within the power source~~ back to the fuel storage unit; and
a third flow path for providing unused and/or partially used fuel and/or reaction product(s) and/or spent reaction solution to a one or more of a reaction product storage unit, the fuel storage unit, and the second flow path.
2. (original) The system of claim 1 further comprising a scrubber for removing carbon dioxide from a source of oxygen for an oxygen reduction reaction occurring within the cells of the power source.
3. (original) The system of claim 1 further comprising a demister for removing liquid droplets from air expelled from the cell cavities of the power source.
4. (original) The system of claim 1 further comprising a voltage booster for boosting the voltage output of the fuel cell system.
